FIRM SHOWS FAITH
IN MESA SECTION

MESA, Sept. 22.—The W. R. Stewart Realty company is showing its faith in the future of Mesa by the lease of one of the most prominent business corners in the town. Mr. Stewart has secured the old quarters of the Salt River Valley bank, located on the northwest corner of the intersection of Main and McDonald streets, and is furnishing it with a handsome equipment of office furniture. There has been an active demand for ready this year and the steadily increasing price of land seems rather to have augmented the demand. Any number of inquiries are being received by the Mesa Commercial club as to investment in the valley. Mr. Stewart, who has proven himself an optimist during his three years' stay here, believes that by taking this commodious and prominent corner he will be in position to handle more conveniently and expeditiously the promised increase of business which he believes will come with the cold weather.

FOR SALE.—30 acres, 4 miles east, 65 acres fine clean alfalfa, 15 acres maize. You can move on tomorrow, the main says, \$175.00 an acre. Terms, W. R. Stewart, Mesa Real Estate.—Adv. 11

A Case of Smallpox.
Miss Maud Ellsworth, a popular young girl of Mesa, daughter of Mr. and Mrs. Ernest Ellsworth, is quarantined at the family residence on East First avenue with well-developed case of smallpox. Miss Ellsworth recently returned from Long Beach and Dr. J. E. Drane, city health officer, thinks that she was exposed to the disease while on the coast. He states that while all who have been with the young woman recently should take the precaution of immediate vaccination, there is nothing to be alarmed about, since occasional cases of this disease may be expected through the south-west.

Many Newcomers.
The hotels and rooming houses of Mesa begin to look like the days of the building of the Roosevelt dam. The registers show a large list of names coming from various states, principally from the south. This, coupled with the inquiries some of the newcomers are making, indicates a widespread interest in this valley as a cotton-growing section.

WANTED Land.—We want to buy for cash, 10, 20 or 40 acres within five miles of Mesa. Money ready. W. R. Stewart, Mesa.—Adv. 11

Goes to Chandler.
Miss Lucile Brown, of the local telephone exchange, has been transferred to the Chandler office. Miss Brown formerly was reporter on the Mesa daily paper.

He Goes Hunting.
M. L. Gibbons, of the Gibbons Undertaking establishment, left yesterday with John Nelson for Heber, where he goes on a turkey hunting expedition. Mr. Gibbons has not been very well for the last few days and will work off his indisposition by a slaughter of the innocents. Nelson is a good-natured comrade and Gibbons' friends insinuate that tame turkeys from the Nelson ranch will be driven across the pathway of the Mesa nimrod.

FOR SALE.—120 acres five miles out, 25 acres fine cotton, 55 acres maize, 10 acres alfalfa. You get it now, only \$155.00 an acre on terms. W. R. Stewart, Mesa Real Estate.—Adv. 11

Grade School's Grow.
The Mesa grade pupils now number 165, or 50 more than on the first day of school. These, with the high school enrollment of 275, total 440. The latter figures will be greatly increased before the winter sets in. New people are coming in rapidly and at present there are a considerable number of children belonging to the cotton pickers' families who have not started to school. This applies also to the children of local Mexican families. The boards of the high and grade schools met in joint session on Thursday night to consider this delinquency, and it is probable that the truant officer will have a large-sized job cut out for him.

RAIN BENEFIT IN PAST WEEK
Rains early in the week were beneficial to ranges, which are in fair to good condition. Cattle are in a rise in very good condition. The rains also revived large areas of beans and grain sorghums which were at a standstill on account of dry weather. In the irrigated districts cotton picking, haying and plowing for winter grains continues. The rain was not favorable for cotton since any prolongation of the growing season at this time may expose the top crop to danger from frost.

THE VITAL TRUTH

The Christian Science Monitor.
The fact that Christian Science is lessening the sum total of sin, sickness and disaster contains great reassurance for the human race. The human heart is turning to its teaching for help, and finding a perfect remedy and a clear answer to all its questions. Christian Science is, therefore, the greatest thing in the world and the only hope of humanity. After long centuries of preparation the seed that was sown by Christ Jesus is growing up and nineteen hundred and sixteen is beginning to reap the harvest. This age, because there is more readiness to receive, than at the former periods of the world's history, becomes the recipient of the greatest blessing of all time—the exact knowledge of God. "Science and Health with Key to the Scriptures," the text-book of Christian Science, contains the full statement of this knowledge, and those who run may read and learn about it. Mrs. Eddy, its author, made a statement, received, and substantiated with that of the Founder of Christianity, when she wrote on page 110, "No human pen nor tongue can express the Science contained in this book. Science and Health, and neither tongue nor pen can overthrow it." Christ Jesus said, "Heaven and earth shall pass away, but my words shall not pass away."

The centuries that intervened between Jesus' first statement of Christianity, and Mrs. Eddy's rediscovery of his statement, have been centuries of gradual development. The truth proclaimed by Jesus has been at work, creating through its inevitable vitality, a better and so more receptive attitude in humankind. Realizing, as it can be realized today, owing to the teaching of Christian Science, the vastness of the revelation Jesus gave, and looking back over the interval between his day and ours, it might seem as if his words had practically been lost, so utterly without proof were they for so long a period, but that would be a mistake, because those words were the expression of the eternal ever-acting reality. That fact made Jesus' words immortal, and the knowledge which urged him to speak was, as it were, put into the mass of human thought, there to act as a leaven. That leaven has been always at work. He spoke to a densely material age, but his clear penetrating and spiritual vision gauged accurately the value of spiritual truth, and so he could say with certainty that his words could not pass away. Power, he apprehended as Spirit, and materiality as powerlessness, and so he knew that the material senses could not destroy them.

When Christian Science is understood, even in a measure, it reveals the magnitude of Christ Jesus' revelation to the world, then it is plainly discerned that the action of his piercing understanding of Spirit was, to the carnal mind, like the sowing of the seed which must grow to the carnal mind's ultimate harvest. Indeed, the living truth is the seed within itself, of which the growth is inevitable. Truth and error cannot dwell together, so the truth has been gradually undermining the opposition which the carnal mind cherishes towards God, divine Principle, and today witnesses the full-fledged idea of Christian healing, saving wonders and miracles. That is, to the material senses which

Deaconess hospital is admitted. On Thursday the infant became dangerously ill and the mother, who is being held on a murder charge, was permitted to accompany the child to the hospital where, according to the day and night nurse, she has hovered over the child of the youngster. At a late hour last evening the mother's anxiety was relieved by the report that her little one was out of danger.

ANNVOYANCES OF WAR TIMES MANY
(New York Sun)
There are some things about the organization of the war time life of a country that seem utterly inexplicable. For instance, after 9 o'clock at night in any public place in London one may not buy a packet of cigarettes. If a group of men sitting at a table exhaust the supply a waiter will wheel over to them a little cart laden with cigarette packages, and each one in the party may buy a single cigarette. No amount of pleading will convince the attendant that he must just as well sell a package at a time.

There certainly isn't any ultimate economy of time or service in this way of doing it. The way people smoke, men and women alike, in public places doesn't suggest, either, that there is any particular saving of tobacco. But it's the rule, under the defense of the realm act, that legislative marvel which has put into the hands of the war cabinet a miscellany of powers which frequently are exercised in most illogical ways. The proprietors of the places seem to be thoroughly devoted

ACT OF COURT SAVES WEE TOT
That the life of a little child has been saved by the timely act and kindness of the court and sheriff's office in permitting Mrs. Sarah E. Ochoa and her baby to be removed from the county jail to the Arizona

MACHINE GUN MOUNTED ON YOUR CAR WILL HELP IN HOME DEFENSE

A machine gun mounted on an automobile. Machine guns can be mounted on automobiles so handily that the idea is proposed as an excellent home defense measure. The owner of an automobile, in a case of necessity, might be supplied with a machine gun and made ready for quick action. The machine gun is also valuable as an anti-aircraft gun and would be an effective defense against air raids if such ever occur. The photo shows Mr. and Mrs. H. M. Busch, touring in their car to demonstrate the machine gun's value.

Now Being Demonstrated

A ONE UNIT MILL
showing the recovery of

VANADIUM

IS NOW BEING DEMONSTRATED AT

303 N. 1st St.

By Harry S. Bryan of the Minerals Recovery Co.,
of Denver, Colo. This is a unit of the mill that is
to be purchased by

to the strict enforcement of those regulations which enable them to make an additional profit. In the matter of cigarettes, for instance, when they are bought one at a time the price is hoisted about 50 per cent above the price that would be paid on a package basis.

The government has decided that no more tea and coffee shall be imported for an indefinite period, in order to save tonnage. This would not constitute a very severe hardship because there are preposterously big stocks of both these staples in the country. But the prices of both tea and coffee have been steadily mounting up, despite threats of the government to commandeer supplies and market them at fixed rates involving a modest and reasonable profit.

If one goes to a grocer's shop to buy sugar he will be allowed perhaps as much as three or four pounds, provided he makes aggregate purchases of other articles amounting to 3 shillings or 4 shillings. Soda is almost not to be had and only in very small quantities, a pound or two at a time. The explanation of this is that so immense a quan-

tity of soda was destroyed in a munition works fire and explosion. Soap is getting scarcer all the time, and of course more expensive, too.

A woman going into a shop in the early evening to ask for some ordinary black hairpins was told after the attendant had consulted her wrist watch that it was too late to sell hairpins. No more wool or synthetic complaints are heard about any of the wartime deprivations than these which relate to hairpins. Quite a long time ago the further manufacture of these presumably very necessary articles was prohibited. It is insisted that there are plenty in the country, but somehow when one looks at the ladies' coiffures he gets the impression that the dear creatures are economizing a bit.

WILLS BIG FORTUNE TO PRIVATE IN ARMY

Man at Fort Oglethorpe Finds Him- self Heir to Millions and a Half Dollars. Must Marry in Year.

(Memphis Commercial Appeal)
Charles Hoffman, a private in Company K, Fifty-second United States Infantry, at Fort Oglethorpe, has been notified that he has fallen heir to a fortune of \$1,500,000 by the death of an uncle, Marvin Royce of Detroit, Mich. Hoffman is 23 years old and has led the life of a soldier of fortune for some years. His father, Fred Hoffman, is a wealthy chair manufacturer of Detroit. A provision of the will of the deceased uncle provides that in order to secure the fortune young Hoffman must marry within a year.

LYNCH NEGRO

HOUSTON, Tex., Sept. 21.—A negro cook working for an oil contractor was taken from the jail at Goose Creek this afternoon and lynched by a mob of eight hundred oil field workers. The negro was charged with attacking the wife of an oil driller.
